Exhibit E

DECLARATION

DECLARATION UNDER PENALTY OF PERJURY

I, John McMillan, do hereby declare under penalty of perjury as follows:

1. I am the General Manager of North Carolina RSA 3 Cellular Telephone Company d/b/a Carolina West Wireless ("Carolina West")
2. This Affidavit is submitted in support of Carolina West's Petition for Designation as an Eligible Telecommunications Carrier ("ETC").
3. Carolina West currently provides cellular service in the North Carolina 3 Rural Service Area ("RSA") – Ashe and the North Carolina 2B1 Rural Service Area ("RSA")- Yancey.
4. As a carrier not subject to state commission jurisdiction in the State of North Carolina, Carolina West is seeking designation as an ETC under Section 214(e)(6) of the Communications Act of 1934, as amended, 47 U.S.C. § 214(e)(6).
5. Carolina West meets the criteria for ETC designation as explained herein.
6. Carolina West is a "common carrier" for purposes of obtaining ETC designation pursuant to 47 U.S.C. § 214(e)(1). A "common carrier" is generally defined in 47 U.S.C. § 153(10) as a person engaged as a common carrier on a for-hire basis in interstate communications by wire or radio. Section 20.9(a)7 of the Commission's Rules provide that cellular service is a common carrier service. *See* 47 C.F.R. § 20.9(a)(7).
7. Carolina West currently offers and is able to provide, within its designated service areas, the services and functionalities identified in 47 C.F.R. § 54.101(a). Each of these services and functionalities is discussed more fully below.
 - a. Voice-grade access to the public switched telephone network. The FCC concluded that voice-grade access means the ability to make and receive phone calls, within a bandwidth of approximately 2700 Hz within the 300 to 3000 Hz frequency range. *See Federal-State Joint Board on Universal Service, CC Docket No. 96-45, First Report and Order*, 12 FCC Rcd 8776, 8810-11 (1997) ("*Universal Service Order*"). Carolina West meets this requirement by providing voice-grade access to the public switched telephone network. Through its interconnection arrangements with local telephone companies, all customers of Carolina West are able to make and receive calls on the public switched telephone network within the specified bandwidth.
 - b. Local Usage. Beyond providing access to the public switched network, an ETC must include local usage as part of a universal service offering. To date, the FCC has not quantified a minimum amount of local usage required to be included in a universal service offering, but has initiated a separate proceeding to address this issue. *See Federal-State Joint Board on Universal Service, Memorandum Opinion and Order and Further Notice of Proposed Rulemaking*, 13 FCC Rcd 21252 (1998) ("*October 1998 NPRM*"). As it relates to local usage, the NPRM sought comments on a definition of the public service package that must be offered

by all ETCs. Specifically, the FCC sought comments on how much, *if any*, local usage should be required to be provided to customers as part of a universal service offering. *October 1998 NPRM*, 13 FCC Rcd at 21277-21281. In the *Universal Service Order*, the FCC deferred a determination on the amount of local usage that a carrier would be required to provide. *Universal Service Order*, 12 FCC Rcd at 8813. Any minimum local usage requirement established by the FCC as a result of the *October 1998 NPRM* will be applicable to all designated ETCs, not simply wireless service providers. Carolina West will comply with any and all minimum local usage requirements adopted by the FCC. Carolina West will meet the local usage requirements by including local usage as part of a universal service offering.

c. Dual-tone, multi-frequency ("DTMF") signaling, or its functional equivalent. DTMF is a method of signaling that facilitates the transportation of call set-up and call detail information. Consistent with the principles of competitive and technological neutrality, the FCC permits carriers to provide signaling that is functionally equivalent to DTMF in satisfaction of this service requirement. 47 C.F.R. § 54.101(a)(3). Carolina West currently uses out-of-band digital signaling and in-band multi-frequency ("MF") signaling that is functionally equivalent to DTMF signaling. Carolina West therefore meets the requirement to provide DTMF signaling or its functional equivalent.

d. Single-party service or its functional equivalent. "Single-party service" means that only one party will be served by a subscriber loop or access line in contrast to a multi-party line. *Universal Service Order*, 12 FCC Rcd at 8810. The FCC concluded that a wireless provider offers the equivalent of single-party service when it offers a dedicated message path for the length of a user's particular transmission. *Id.* Carolina West meets the requirement of single-party service by providing a dedicated message path for the length of all customer calls.

e. Access to emergency services. The ability to reach a public emergency service provider by dialing 911 is a required service in any universal service offering. Enhanced 911 or E911, which includes the capability of providing both automatic numbering information ("ANI") and automatic location information ("ALP"), is only required if a public emergency service provider makes arrangements with the local provider for the delivery of such information. *See id.* at 8815-17. Carolina West currently provides all of its customers with access to emergency service by dialing 911 in satisfaction of this requirement. Carolina West will comply with all Phase II E-911 requirements.

f. Access to operator services. Access to operator services is defined as any automatic or live assistance provided to a consumer to arrange for the billing or completion, or both, of a telephone call. *Id.* at 8817-18. Carolina West meets this requirement by providing all of its customers with access to operator services provided by either the Company or other entities (e.g., LECs, IXC, etc.)

g. Access to interexchange service. A universal service provider must offer consumers access to interexchange service to make and receive toll or interexchange calls. Equal access, however, is not required. "The FCC do[es] not include equal access to interexchange service among the services supported by universal service mechanisms." *Id.* at 8819. Carolina West presently meets this requirement by providing all of its customers with the

ability to make and receive interexchange or toll calls through direct interconnection arrangements the Company has with several IXC's. Additionally, customers are able to reach their IXC of choice by dialing the appropriate access code.

h. Access to directory assistance. The ability to place a call to directory assistance is a required service offering. *Id.* at 8821. Carolina West meets this requirement by providing all of its customers with access to directory assistance by dialing "411" or "555-1212".

i. Toll limitation for qualifying low-income consumers. An ETC must offer either "toll control" or "toll blocking" services to qualifying Lifeline customers at no charge. The FCC no longer requires an ETC to provide both services as part of the toll limitation service required under 47 C.F.R. § 54.101(a)(9). *See Universal Service Fourth Order on Reconsideration*, FCC 97-420 (Dec. 30, 1997). In particular, all ETCs must provide toll blocking, which allows customers to block the completion of outgoing toll calls. *Universal Service Order*, 12 FCC Rcd at 8821-22. Carolina West currently has no Lifeline customers in North Carolina because only carriers designated as an ETC can participate in Lifeline. *See* 47 C.F.R. § 54.400-415. Once designated as an ETC, Carolina West will participate in Lifeline as required, and will provide its current toll blocking capabilities in satisfaction of the FCC's requirement. Today, the Company provides toll-blocking services for all international calls and toll blocking for selected customers. Accordingly, Carolina West currently has the technology to provide toll blocking and will use this technology to provide the service to its Lifeline customers, at no charge, as part of its universal service offerings.

8. Carolina West will provide the supported services using its existing network infrastructure, which includes the same antenna, cell-site, tower, trunking, mobile switching, and interconnection facilities used by the company to serve its existing conventional mobile cellular service customers.

9. I declare under penalty of perjury that the foregoing is true and correct. Executed on April 23, 2004.

HIGH-COST CERTIFICATION LETTER

April 28, 2004

Federal Communications Commission
445 12th Street S.W.
Washington, D.C. 20554

**Re: North Carolina RSA 3 Cellular Telephone Company
High-Cost Certification**

To the Commission:

North Carolina RSA 3 Cellular Telephone Company d/b/a Carolina West Cellular Telephone Company ("Carolina West" and/or "Company") has submitted a Petition for ETC designation in the State of North Carolina as required by Sections 54.313(b) and 54.314(b) of the Federal Communications Commission's rules, 47 C.F.R. §§ 54.313(b), 54.313(b), Carolina West hereby submits the certification below in order to begin receiving high-cost support in its designated ETC area.

Accordingly, as General Manager of Carolina West, I hereby certify on behalf of the company and under penalty of perjury that all high-cost support provided to the Company will be used only for the provision, maintenance, and upgrading of facilities and services for which the support is intended, pursuant to Section 254(e) of the Telecommunications Act of 1996, 47 U.S.C. § 254(e). I also certify that I am authorized to make this certification on the company's behalf.

John McMillan

John McMillan, General Manager

Date 4/28/04

DECLARATION UNDER PENALTY OF PERJURY

I, John McMillan, do hereby declare under penalty of perjury as follows:

1. I am the General Manager of North Carolina RSA 3 Cellular Telephone Company d/b/a Carolina West Wireless ("Petitioner").
 2. To the best of my knowledge, the Petitioner referred to in the foregoing Petition, including all officers, directors, or persons holding 5% or more of the outstanding stock or shares (voting and/or non voting) of the applicant as specified in 1.2002(b) of the Commission's rules are not subject to a denial of federal benefits, including FCC benefits, pursuant to Section 5301 of the Anti-Drug Abuse Act of 1988, 21 U.S.C. §862.
 3. I declare under penalty of perjury that the foregoing is true and correct.

Exhibit H

**STATE OF NORTH CAROLINA
UTILITIES COMMISSION
RALEIGH**

DOCKET NO. P-100, SUB 133c

BEFORE THE NORTH CAROLINA UTILITIES COMMISSION

In the Matter of
Designation of Carriers Eligible for Universal)
Carrier Support) **ORDER GRANTING PETITION**

BY THE COMMISSION: On August 22, 2003, North Carolina RSA3 Cellular Telephone Company, d/b/a Carolina West (Carolina West), a commercial mobile radio service (CMRS) provider, filed a Petition seeking an affirmative declaratory ruling that the Commission lacks jurisdiction to designate CMRS carrier eligible telecommunications carrier (ETC) status for the purposes of receiving federal universal service support.

In support of its Petition, Carolina West stated that it was a CMRS provider authorized by the Federal Communications Commission (FCC) to provide cellular mobile radio telephone service in North Carolina, and that the FCC had clearly recognized that CMRS carriers such as Carolina West may be designated as ETCs. ETC status is necessary for a provider to be eligible to receive universal service support. Section 214(e)(6) of the Telecommunications Act provides that if a state commission determines that it lacks jurisdiction over a class of carriers, the FCC is charged with making the ETC determination. The FCC has stated that, in order for the FCC to consider requests pursuant to this provision, a carrier must provide an "affirmative statement" from the state commission or court of competent jurisdiction that the state lacks jurisdiction to perform the designation. To date, several state commissions have declined to exercise such jurisdiction.

North Carolina has excluded CMRS from the definition of "public utility." See, G.S. 62-3(23)). Pursuant to this, the Commission issued its Order Concerning Deregulation of Wireless Providers in Docket Nos. P-100, Sub 114 and Sub 124 on August 28, 1995, concluding that the Commission no longer has jurisdiction over cellular services. Accordingly, Carolina West has now requested the Commission to issue an Order stating that it does not have jurisdiction to designate CMRS carriers ETC status for the purposes of receiving federal universal service support.

WHEREUPON, the Commission reaches the following

CONCLUSIONS

After careful consideration, the Commission concludes that it should grant Carolina West's Petition and issue an Order stating that it lacks jurisdiction to designate ETC status

for CMRS carriers. As noted above, in its August 28, 1995, Order In Docket Nos. P-100, Sub 114 and Sub 124, the Commission observed that G.S. 62-3(23)), enacted on July 29, 1995, has removed cellular services, radio common carriers, personal communications services, and other services then or in the future constituting a mobile radio communications service from the Commission's jurisdiction. 47 USC 3(41) defines a "state commission" as a body which "has regulatory jurisdiction with respect to the intrastate operation of carriers." Pursuant to 47 USC 214(e)(6), if a state commission determines that it lacks jurisdiction over a class of carriers, the FCC must determine which carriers in that class may be designated as ETCs. Given these circumstances, it follows that the Commission lacks jurisdiction over CMRS services and the appropriate venue for the designation of ETC status for such services is with the FCC. Accord., Order Granting Petition, ALLTEL Communications, Inc., June 24, 2003.

IT IS, THEREFORE, SO ORDERED.

ISSUED BY ORDER OF THE COMMISSION.

This the 28th day of August, 2003.

NORTH CAROLINA UTILITIES COMMISSION
